

Jack Jewson

Senior Lecturer at Monash EBS

Did my PhD at the University of Warwick in the UK before an extended post-doc at Universitat Pompeu Fabra in Barcelona.

Researching along two themes in Bayesian Statistics:

- ▶ *Generalised Bayesian Updating* which replaces log-likelihoods by robust loss functions to improve estimation and decision making
- ▶ *Variable Selection* seeking to estimate structure in data by investigating the presence or absence of certain aspects of the model i.e whether a parameter is non-zero or zero

Other interests include

- ▶ Playing cricket and watching football (soccer)
- ▶ Cooking (not baking!!)
- ▶ Board games
